Frequently Asked Questions

WHAT IS FACETITE?

FaceTite provides dramatic improvement in skin laxity on the face and neck, which was previously only attainable through a surgical procedure such as a facelift. FaceTite utilizes minimally invasive radio-frequency energy to melt fat and tighten skin.

BENEFITS

Non-excisional · No scars · Superior body contouring · Significant body tightening results (up to 40% skin contraction observed in clinical studies) · Uniform treatment · Consistent results · Less bruising, swelling and pain · Shorter downtime · Improved safety

WHAT AREAS CAN BE TREATED?

Any areas on the face and neck with saggy skin can be treated. This includes the double chin, jowl line as well as other areas with deep lines and loose skin.

WHAT KIND OF PROCEDURE CARE IS REQUIRED?

FaceTite is a minimally-invasive procedure performed under local anesthesia or light sedation. Post procedure, patient can go home and resume regular activities shortly after. Wearing a compression garment is required for best results.

HOW IS THIS BETTER THAN A FACELIFT?

By avoiding a facelift excisional procedure, patients will be scar free and will benefit from reduced post-procedural swelling and discomfort. This is a less traumatic process with a natural looking final result.

HOW QUICKLY WILL I SEE RESULTS?

Results can be seen immediately, with best results noticeable after 6-12 weeks.

Technology

FaceTite is a safe and effective minimally invasive procedure, where a wand is inserted under the skin to melt fat inside while tightening the skin on top. This is a new procedure that is the next best thing to a surgical facelift, for patients who don't want to have a dramatic surgery, this is the perfect solution.

The treatment can be performed under local anesthesia or even light sedation it provides surgical results without the scars. Patients can be assured of a minimally invasive aesthetic procedure with decreased pain, swelling and downtime, and avoid larger surgical procedures.

1 treatment is needed and results continue to improve up to 3 to 6 months afterwards.

SAFETY:

Built-in safeguards assure high safety levels. FaceTite's proprietary technology includes the regulation of skin temperature, impedance levels, energy monitoring, and cut-off levels.

ABOUT INMODE:

InMode is an innovation driven company that develops a broad range of products for minimally-invasive cosmetic surgery based on patented proprietary RFALTM (Radiofrequency Assisted Lipolysis) technology and non-invasive procedures for body and facial aesthetics. InMode Aesthetic devices creates a whole new category of minimally invasive body recontouring and contraction procedures offering reliable and effective applications for physicians, with safety and comfort in mind for patients.
